Legal Disclaimer

The purpose of this White Paper is to present the World's First Masternode Management Company (WFMMC) project to potential token holders in connection with the proposed Token Launch. The information set forth below may not be exhaustive and does not imply any elements of a contractual relationship.

Its sole purpose is to provide relevant and reasonable information to potential token holders in order for them to determine whether to undertake a thorough analysis of the company with the intent of acquiring WFMMC tokens.

Nothing in this White Paper shall be deemed to constitute a prospectus of any sort or a solicitation for investment, nor does it in any way pertain to an offering or a solicitation of an offer to buy any securities in any jurisdiction. This document is not composed in accordance with, and is not subject to, laws or regulations of any jurisdiction which are designed to protect token holders. In the event any part of this model is deemed to fall under Securities and Futures Act (SFA) or Financial Advisers Act (FAA) or collective investment scheme (CIS) or debenture or share, the business proposal will be amended to the best of abilities to prevent being classified under those categories. This includes changing or removing certain business processes. The budgets from the processes will be reallocated for other sections which would still be allowed if this happens.

Certain statements, estimates and financial information contained in this White Paper constitute forward-looking statements or information. Such forward-looking statements or information involve known and unknown risks and uncertainties which may cause actual events or results to differ materially from the estimates or the results implied or expressed in such forward-looking statements.

This White Paper is the primary official source of information about the WFMMC Token Launch. The information contained herein may from time to time be translated into other languages or used in the course of written or verbal communications with existing and prospective customers, partners etc. In the course of such translation or communication some of the information contained herein may be lost, corrupted, or misrepresented. The accuracy of such alternative communications cannot be guaranteed. In the event of any conflicts or inconsistencies between such translations and communications and this official English language White Paper, the provisions of this English language original document shall prevail.

Executive Summary

World's First Masternode Management Company (WFMMC), located in Toronto, Ontario, Canada aims to solve the biggest problem that prevents masternode investors from entering a lucrative masternode investment market.

The big problem is lack of a safe and user friendly marketplace where masternode investors can buy and sell masternodes. WFMMC aims to make buying and selling masternodes as easy as buying something at eBay or Amazon. To accomplish that we're developing a marketplace solution where masternode sellers and buyers can meet to conduct business transactions. In addition, WFMMC offers full-service masternode hosting packages for a modest fee.

Masternodes are a series of servers that support a blockchain network. Masternode owners are incentivized by gaining a share of the block rewards in their respective cryptocurrency. There are currently 399+ POS crypto currencies that reward masternode owners with an equivalent of \$1.00 - \$500.00 per day per masternode.

WFMMC will use its own WFM token as a payment method to pay for a buy or sale transaction on the marketplace platform. Masternode ownership information will be stored in blockchain together with financial records.

WFMMC will finance its business activities with a) Service fee applied to every masternode buy/sell transaction; b) Service fee applied for full-service hosting packages; c) Company's internal pool of masternodes.

World's First Masternode Management Company is looking to raise 5,000 (five thousand) of Ethereum (ETH) crypto coins.

Company's team is represented with professionals who know what it takes to turn a project into a success!

Masternodes Explained

What is a Masternode?

Masternode is a virtual computer that runs software that could be referred to as "masternode software". Among a list of other things that "masternode software" does -- it issues confirmations to miners that minted coins are legit and are added to the total amount of available coins. That's as simple as it gets.

What a masternode does

Masternodes serve certain functions on a network a local cryptocurrency wallet simply can't do because it wasn't designed to carry masternode functions.

Here are three examples of what some masternodes actually do:

Masternodes manage privacy-related functions for crypto coins like Zcoin, PivX, Dash, Monetary Unit.

Masternodes manage "Instant Send" capabilities for crypto currencies like Dash, Crown or Monetary Unit.

Masternodes are used to maintain a decentralized cryptocurrency exchange for crypto coins like BlockNet or Exscudo.

Requirements to operate a masternode

Each cryptocurrency has different requirements, in terms of bond (a certain amount coins necessary to set up a masternode) and computing power of the VPS (Virtual Private Server). Generally speaking, a \$12/month VPS server will do.

Masternode ROI

In general, masternodes generate from \$1 to \$1,500 per day in their respective crypto currencies, sold at the current exchange rate. However, the ROI of a given Masternode depends on the following:

- The price at which the bond (collateral coins) was bought
- The block reward or the incentive mechanism
- The number of masternodes operating
- The monetary cost to host masternodes
- The time needed to host masternodes
- The Tax implications of masternode income
- The price at which the mined tokens are sold
- The final price at which the bond is sold

Problems

Everything about masternodes is quite complicated for an average computer user. Masternode setup and maintenance takes more effort than a typical computer user could do. But, that's exactly why masternode investors get compensated for. Here's a list of problems a typical masternode-owner-to-be has to deal with:

No marketplace where investors can buy and sell masternodes or coin collateral packs

When people want to buy crypto coins they go to crypto-currency exchanges. Fortunately, there isn't a shortage of crypto currency exchanges for all kinds of investors.

One of the factors that prevents masternode investors from entering a lucrative masternode investment market is that there isn't a marketplace where investors can safely buy and sell masternodes without even knowing how and why a masternode works.

WFMMC masternode marketplace will be as popular as some crypto currency exchanges but for buying and selling masternodes and collateral coin packs.

Masternode set up is complicated for an average investor

Masternode software was designed to be run with Unix-based workstations. Even though very thorough step-by-step installation guides are out there, a typical cryptocurrency investor gets scared just by looking at the Unix command prompt or has to contract someone who knows what he's doing.

No reliable masternode management/monitoring system

Yes - there are expensive server monitoring systems...

Yes - there are various VPS monitoring systems...

But - No - there aren't a masternode monitoring/management system capable of scanning debug log files for custom error messages. And, there's no notification system for the server administrator.

A masternode isn't just "a server". It's a valuable part of a crypto-currency network of nodes, so a masternode must be treated with respect it deserves because it generates rewards.

A masternode investor has to be "in the know"

of what's happening with the crypto coin used as collateral to launch and maintain a masternode. Otherwise, there are risks like:

- a) Dealing with stress caused by a sudden drop in coin's price, therefore drop in masternode's profitability, because of not following the news;
- b) Acquiring coins on the raise and missing expected earnings;
- c) Base selling or buying decisions on emotions or fake news;
- d) Monitor BitcoinTalk and other forums and chat groups daily to make sure the coin is healthy and will continue generating profits
- e) Getting involved with a dead coin and so on
- f) More, much more...

Trust issues

With a price of an average masternode of around two (2) BitCoin trust is a big issue.

Who can an average potential masternode owner trust?

Can he (or she) trust a guy off the Internet to install a masternode? Remember, we're talking about intangible crypto currency that worth real money.

Can someone found at a forum can be trusted and qualified to execute a sequence of steps with an e-Wallet to connect it to a masternode?

How do you find a trustworthy "fixer" to fix server-side things, or to do an upgrade or to change hosting providers?

WFMCMC will establish itself as a safe and reliable company authority in the masternode management niche so coming to us will be a natural choice for any masternode owner - current or future.

The collateral-buying process is complicated

An average masternode investor has to jump through quite a few hoops in order to get a masternode started. Here's how the process of purchasing a collateral coin pack works today:

#1: Convert fiat money into Bitcoin (BTC) at the crypto-currency exchange. In most cases go through the verification process which can take from a couple of hours to a couple of weeks .

#2: Send Bitcoin (BTC) to a cryptocurrency exchange that the desired masternode coin is traded. Wait for a few hours.

#3: Get verified with a crypto exchange to lift 0.5-2 BTC daily trading limit. Wait for up to 10 business days.

#4: Place a Buy order for a desired cryptocurrency a masternode will built for. Either patiently wait for a Buy order to get fulfilled or start buying coins aggressively which will drive the coin's price up. Wait for an order fulfillment.

#5: Transfer money to a local windows-based e-Wallet. Wait for confirmations.

#6: Send a required amount of coins to be used as a masternode collateral. Wait for confirmations.

#7: Get the masternode software installed. Wait for 12-24 hours for a cheap VPS to compile the masternode software.

#8: Launch a masternode - edit configuration files, make sure e-Wallet and a masternode are connected.

#9: Enjoy watching masternode rewards coming right into the e-Wallet

Solution

World's First Masternode Management Company will make masternodes attractive to crypto currency enthusiasts and investors.

Masternode marketplace that simplifies masternode buying and selling processes

WFMCC is to develop a market place where buyers and sellers can conduct business selling two types of items - live masternodes or collateral coin packs. Live masternodes are hosted with the WFMCC. Collateral coin packs can be used to either launch a masternode with the WFMCC management

Here are a few screenshots of the User Interface of the future Masternode Marketplace:

Simplify masternode monitoring and management

WFMMC will automate and simplify masternode monitoring and basic management process by developing a masternode monitoring and management system available to non-commercial users for free and for a very modest fee to commercial users.

Such system will monitor masternode servers and notify both - clients and system administrators via e-mail and SMS message and automated phone calls in case if something goes wrong with a masternode. So the problem can be fixed fast and without too much downtime.

Here's a screenshot of the user interface of the masternode monitoring and management tool:

Offer analysis and masternode market updates

World's First Masternode Management Company had established relationships with cryptocurrency analysts and traders who will share their market observations, trend predictions and analysis for both - free and for a fee.

WFMMC will provide clients - masternode owners - with a quality weekly e-newsletter with market news and analysis. WFMMC also plans to launch at least one paid newsletter whereby people would have to pay in order to receive in depth masternode investment recommendations.

Popularize masternodes and masternode investment via social & content marketing

Two of World's First Masternode Management Company have background in digital marketing. Not only they understand the importance of marketing but they also understand how to drive massive traffic to a web site because that's what they've been doing for full time years.

In order to popularize masternodes and investing in masternodes WFMMC plans to hire a full time blogger who will be the "social face" of a company. Or, if a suitable candidate for video blogging couldn't be recruited within a reasonable period of time, will use articles and cast studies instead of video blogging.

Implementation Plan

Revenue Model

WFMMC has a mixed revenue model, which could be divided into the following segments:

- Fee for service in the amount of 0.5%-1.5% from a masternode sale transaction
- Fee for service for masternode managed hosting
- Profit from advisory service - paid masternode market analysis newsletter, paid consulting

The Core Financial Engine

To ensure company's financial well being and the bright future of the WFM token, Company's management team will use a part of crypto funds from the private sale and ICO

token sale to establish, build and launch an own private pool of 200+ (over two hundred) masternodes.

The WFMCC will receive a weekly management fee in the amount of 35% (thirty five percent) which will cover for company's business expenses and team members' wages and contracting professionals.

Such strategy will allow the company to cover operational expenses until the company becomes profitable. Having own pool of masternodes will definitely help developers code a monitoring and management solution.

Growth Strategy

1. Create a content media buzz around masternodes. Popularize masternodes. Make them even more popular than mining
2. Attract masternode buyers via content marketing and paid advertising
3. Motivate existing clients to add more masternodes to their portfolios
4. Re-invest 65% of the monthly profit into increasing the pool of masternodes so we can hire more smart people to do smart things

Usage of Funds

Operations:	15%
Build and launch a pool of masternodes	40%
ICO costs:	15%
Marketing:	5%
Legal:	2%
Reserve Fund:	23%
Total:	100%

Development Roadmap

Q1 - 2018 January 2018 - March 2018	<ul style="list-style-type: none">✓ Researching and evaluating opportunities masternode investment opportunities✓ Studying and analyzing the earning potential behind various crypto-coins that are capable to run masternodes✓ Launching various masternodes to assess the profit possibility✓ Conducting interviews to assemble the Dream-Team
--	---

Masternode Marketplace and Monitoring Tool

<p>Q2 - 2018 April 2018 - June 2018</p>	<ul style="list-style-type: none"> ✓ Assembling of the core team is completed ✓ Developing a web site and the White Paper ✓ Developing a User Interface and project scope ✓ Raise funds via a private token sale
<p>Q3 - 2018 July 2018 - September 2018</p>	<ul style="list-style-type: none"> ✓ Start the development of an Alpha Version of the Masternode marketplace platform ✓ Begin coding the free masternode monitoring and management tool ✓ Build and launch a first batch of a pool of 100+ masternodes -- company's financial heart ✓ Engage in multiple community-building activities ✓ Start popularizing masternodes via blogging and content marketing
<p>Q4 - 2018 October 2018 - December 2018</p>	<ul style="list-style-type: none"> ✓ Release Alpha Version of the Masternode monitoring and management tool ✓ Release an Alpha Version of a masternode marketplace ✓ Start B2B marketing campaign of the masternode rapid deployment and management services to blockchain companies that need masternodes ✓ Build and launch a second batch of a pool of 100+ masternodes -- company's financial heart ✓ Continue popularizing masternodes and building community
<p>Q1 - 2019 January 2019 - March 2019</p>	<ul style="list-style-type: none"> ✓ Get the WFM token listed with 1-2 crypto currency exchanges ✓ Carefully monitor feedback about user's experience, performance and expectations of Alpha versions of the Marketplace Platform and Free Monitoring and Management Tool ✓ Implement necessary changes and bug fixes ✓ Keeping the "buzz" on by blogging and promoting masternodes
<p>Q2 - 2019 April 2019 - June 2019</p>	<ul style="list-style-type: none"> ✓ Expand company's activities into providing more fee-based analytical and advisory services to new and existing users ✓ Release Beta version of the Masternode Marketplace platform ✓ Release Beta version of a free masternode monitoring and management tool ✓ Achieve a milestone of having 10,000 masternodes monitored and managed by company's software
<p>Q3 - 2019 July 2019 - September 2019</p>	<ul style="list-style-type: none"> ✓ Listen to user's feedback make necessary updates to the Marketplace platform and Free Monitoring and Management Tool ✓ Achieve a milestone of managing 300+ masternodes in the company's pool of msaternodes

	<ul style="list-style-type: none">✓ Hire more smart people to do more smart things that will help masternode investors achieve their goals.✓ Test out customer acquisition campaigns with paid media based on all the customer education done in previous quarters
Q4 - 2019 October 2019 - December 2019	<ul style="list-style-type: none">✓ Increase the number of crypto currency exchanges where the WFFMC token is listed from 1-2 to 2-4✓ Evaluate new growth opportunities in new areas of the cryptocurrency universe. Opportunities we're not aware of today.✓ Be on our way of becoming a recognized #1 Masternode Marketplace in the World

WFM Token

World's First Masternode Management Company had issued a total of 100,000,000 WFM tokens. Here's our breakdown of the total WFM tokens that are being issued:

#	Token Holder	Number of WFM Tokens	% of Total WFM Tokens
1	Private Sale	20,000,000	20%
2	Marketing Fund	5,000,000	5%
3	Team	30,000,000	30%
1	ICO/ Private Investors	45,000,000	45%
	TOTAL	100,000,000	100%

WFM Token Implementation

The WFM token is based on the ERC20 token standard.

Token Usage

WFM token and the blockchain will be used to provide the following services:

- a) Proof of masternode ownership - keep buying/selling transaction in the blockchain
- b) Payment method on the Marketplace platform

c) Masternode rating system - will present our own masternode rating board where investors could see masternodes worth investing in.

Private Sale Initial Coin Offering

The private sale stage will take place on our web site from July 25, 2018 to August 31, 2018.

We offer 20,000,000 WFM tokens in exchange of 1,250 ETH coins with a discount of 29.7% off the ICO token offering price.

The exchange rate is 16,000 WFM tokens for 1 ETH.

Soft cap: 300 ETH

Hard cap: 1,250 ETH

Initial Coin Offering (ICO)

ICO will take place on our platform and/or on the crowd funding platform.

Period: from September 1, 2018 to October 16, 2018.

We offer 45,000,000 WFMMC tokens in exchange of 4,000 ETH coins.

The exchange rate will be 11,250 WFMMC token for 1 ETH.

Soft cap: 1335 ETH / 15,018,750 WFMMC

Hard cap: 4,000 ETH / 45,000,000 WFMMC

To further strengthen the security of the WFMMC platform, we will grant 1% from the reserve of the total WFM tokens to the white-hat hackers who find a bug on our platform.

WFMMC Core Team

 <p>Max Sparrowson</p>	<p>Max is a founder and the Chief Executive Officer (CEO). He's is a digital marketing veteran. Max has enormous hands-on experience planning and executing various projects starting from user acquisition campaigns for various products and services all the way to managing marketing projects from start to finish.</p> <p>Max's greatest passion is "making things work". He's responsible for executing the Development Roadmap as well as automation the WFMMC platform.</p> <p>Max's ability to "connect all the dots" always helped him develop solutions that solve problems.</p>
 <p>Aurel Televko</p>	<p>Aurel is a Co-Founder and Chief Cryptocurrency Officer. He has been involved with crypto currencies from 2013. Starting with just 1 miner Aurel was able to grow operations to 50+ miners and sold the company at its peak. Aurel still trades crypto currencies and keeps up with news and updates.</p> <p>Aurel is responsible for maintaining corporate trading accounts, acquiring coins, researching profitable opportunities, exploring potential opportunities and everything else relate to crypto currency.</p> <p>He will build and lead a team of in-house crypto currency experts who will share their findings with the marketing department.</p>
 <p>Michael Ogilvie</p>	<p>Michael Ogilvie is a co-founder and the Chief Marketing Officer (CMO) of the company. He's a true veteran of the performance marketing industry where he had helped numerous companies sell millions of dollars of their products and services.</p> <p>Michael has executed and managed multiple successful digital lead generation marketing campaigns. He's extensive knowledge, expertise and understanding covers the development of marketing materials (landing and pre-sell pages, pre-roll and banners), lead nurturing, campaign optimization on all levels.</p> <p>Michael's media buying experience and industry contacts will virtually guarantee the Company will find the right</p>

	<p>audience at the right time on a right device to present the masternode offer to potential buyers.</p>
 <p>Alex Klymov</p>	<p>Alex is Chief Technical Officer (CTO). He's a Sr. Systems engineer with 20+ years of experience in Unix/Linux system administration. He has been involved in various Cloud Computing projects which required systems and network infrastructure planning, design and implementation with some of the well-known and recognized Fortune 500 companies.</p> <p>Alex is responsible for everything related to the technical implementation of a masternode pool as well as developing and implementing masternode monitoring and management automation solutions.</p> <p>He will supervise a masternode deployment and platform development teams to make sure all systems work as they should.</p>
 <p>Kiryha Krysko</p>	<p>Kiryha is a Product Manager. He has 20+ years of experience in Computer Graphics field (CG), lately focusing on developing CG production tools with Python.</p> <p>Kiryha has built from scratch a CG animation department in the animation studio where he managed all aspect of design and successfully managed the production of the first Ukrainian CG animated feature film.</p> <p>Kiryha responsible for defining features and functions of a Marketplace and Monitoring Tool as well as overseeing the production and maintenance of the tools.</p>
 <p>Oleg Sinkov</p>	<p>Oleg is a Web Developer's Team Lead. In the past 10+ years Oleg has managed various teams for numerous projects that involved Search Engine Optimization as a part of web development.</p> <p>He manages the web development team ensuring that the team carries out development, testing, planning, maintenance and continuous improvement of various systems.</p> <p>We like him because he shares openly and authentically with others regarding personal feelings, opinions, thoughts, and perceptions about problems and conditions.</p>

 <p>Oleksandr Samosonok</p>	<p>Oleksandr is a competent Project Manager and a Back-End developer.</p> <p>Not only he knows a lot about things like mathematical simulations, research of Stochastic processes, Markov fields and stuff like "parameter evaluation" he has a PH.D in philosophy, mathematics and computer science.</p> <p>Oleksandr "owns" problems rather than blaming them on others. His unique experience includes management and successful launch of several mid- to large- scale software projects.</p>
 <p>Anna Seraya</p>	<p>Anna is an experienced Front-End Full Stack Developer who had been involved in a few interesting projects that involved working with Oracle and JavaScript.</p> <p>Anna is capable of using her knowledge and ability to take a concept and turn it into a finished product. She always understands and is committed to team objectives.</p> <p>Anna speaks Java8, Spring, Tomcat, Jersey, Docker, Hibernate, Oracle, Postgresql, ES6, ReactJS, Angular which is cool.</p>
 <p>Dimitry Siriy</p>	<p>Dimitry is one of those Front-End Full Stack Developers who could take a concept and code it into an MVP (Minimum Viable Product).</p> <p>Being a full stack developer lets Dimitriy spread his wings, test out different technologies, and offer alternative, uncommon solutions to project he works on.</p> <p>Dimitriy is very passionate and strives to better himself as a developer and a human being.</p>

	<p>Emirali is a senior Back End Java Engineer. One of the cool thing's he's got is a degree in Applied Mathematics.</p> <p>Emirali has an extensive development background in enterprise-scale application from concept to a fully deployed project.</p> <p>Emirali has written code for one of the top private banks in Ukraine. We love Emirali because he's 100% transparent at what he does and knows, tells no horror stories and is always cool when asked for help.</p>
<p>Emirali Abduramanov</p>	<p>is a Social Media and Project Support Manager.</p> <p>Vlada has a background in crypto products and services and has played an integral role in a number of startups.</p> <p>Vlada got into crypto through experience with a crypto based company providing mining solutions, and has since continued to be involved in the blockchain scene.</p> <p>She is responsible for creating valuable content and interacting with the community.</p>
	
<p>Vlada Contr</p>	

Conclusions

The Masternode Marketplace and Masternode Management and Monitoring Tool will change the way masternodes are deployed, managed, bought and sold. With our solutions masternode market will never be the same.

In order to make all plans happen, the company is looking for an investment of 300 (three hundred) Bitcoin or 4,000 (four thousand) of Ethereum (ETH) crypto coins.

Company's management is capable of managing and executing such a complex but interesting project. The first release of the platform is scheduled to Winter 2019.

Legal and Regulatory Remarks

Disclaimer of Liability

To the maximum extent permitted by the applicable laws, regulations and rules, WFMCC shall not be liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this Whitepaper or any part thereof by you.

No Representations and Warranties

WFMCC does not make or purport to make, and hereby disclaims, any representation, warranty or undertaking in any form whatsoever to any entity or person, including any representation, warranty or undertaking in relation to the truth, accuracy and completeness of any of the information set out in this Whitepaper.

Representations and Warranties by You

By accessing and/or accepting possession of any information in this Whitepaper or such part thereof (as the case may be), you represent and warrant to WFMCC as follows:

1. you agree and acknowledge that the WFM tokens do not constitute securities in any form in any jurisdiction;
2. you agree and acknowledge that this Whitepaper does not constitute a prospectus or offer document of any sort and is not intended to constitute an offer of securities in any jurisdiction or a solicitation for investment in securities and you are not bound to enter into any contract or binding legal commitment and no cryptocurrency or other form of payment is to be accepted on the basis of this Whitepaper;
3. you agree and acknowledge that no regulatory authority has examined or approved of the information set out in this Whitepaper, no action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction and the publication, distribution or dissemination of this Whitepaper to you does not imply that the applicable laws, regulatory requirements or rules have been complied with;
4. you agree and acknowledge that this Whitepaper, the undertaking and/or the completion of the WFM Initial Token Pre-Sale, or future trading of the WFM tokens on any cryptocurrency exchange, shall not be construed, interpreted or deemed by you as an

indication of the merits of the WFMMC, the WFM tokens, the WFM Token Crowd Sale (each as referred to in this Whitepaper);

5. the distribution or dissemination of this Whitepaper, any part thereof or any copy thereof, or acceptance of the same by you, is not prohibited or restricted by the applicable laws, regulations or rules in your jurisdiction, and where any restrictions in relation to possession are applicable, you have observed and complied with all such restrictions at your own expense and without liability to WFMMC;

6. you agree and acknowledge that in the case where you wish to purchase any WFMMC tokens, the WFM tokens are not to be construed, interpreted, classified or treated as:

- a. any kind of currency other than cryptocurrency;
- b. debentures, stocks or shares issued by any person or entity
- c. rights, options or derivatives in respect of such debentures, stocks or shares;
- d. units in a collective investment scheme;
- e. units in a business trust;

7. you have a basic degree of understanding of the operation, functionality, usage, storage, transmission mechanisms and other material characteristics of cryptocurrencies, blockchain-based software systems, cryptocurrency wallets or other related token storage mechanisms, blockchain technology and smart contract technology;

8. you are fully aware and understand that in the case where you wish to purchase any WFM tokens, there are risks associated with WFMMC and their respective business and operations, the WFM tokens, the WFM Initial Token Private Sale;

9. you agree and acknowledge that WFMMC is not liable for any indirect, special, incidental, consequential or other losses of any kind, in tort, contract or otherwise (including but not limited to loss of revenue, income or profits, and loss of use or data), arising out of or in connection with any acceptance of or reliance on this Whitepaper or any part thereof by you; and

10. all of the above representations and warranties are true, complete, accurate and non-misleading from the time of your access to and/or acceptance of possession this Whitepaper or such part thereof (as the case may be).

Cautionary Note on Forward-Looking Statements

All statements contained in this Whitepaper, statements made in press releases or in any place accessible by the public and oral statements that may be made by WFMMC or their respective directors, executive officers or employees acting on behalf of WFMMC, that are not statements of historical fact, constitute "forward looking statements". Some of these statements can be identified by forward-looking terms such as "aim", "target", "anticipate", "believe", "could", "estimate", "expect", "if", "intend", "may", "plan", "possible", "probable", "project", "should", "would", "will" or other similar terms.

However, these terms are not the exclusive means of identifying forward-looking statements. All statements regarding WFMMC's and/or, business strategies, plans and prospects and the future prospects of the industry which WFMMC is in are forward-looking statements.

These forward-looking statements, including but not limited to statements as to WFMMC's revenue and profitability, prospects, future plans, other expected industry trends and other matters discussed in this Whitepaper regarding WFMMC and/or the Distributor are matters that are not historical facts, but only predictions. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual future results, performance or achievements of WFMMC to be materially different from any future results, performance or achievements expected, expressed or implied by such forward-looking statements. These factors include, amongst others:

1. changes in political, social, economic and stock or cryptocurrency market conditions, and the regulatory environment in the country in which WFMMC conducts its respective businesses and operations;
2. the risk that WFMMC may be unable or execute or implement their respective business strategies and future plans;
3. changes in interest rates and exchange rates of fiat currencies and cryptocurrencies;
4. changes in the anticipated growth strategies and expected internal growth of WFMMC;
5. changes in the availability and fees payable to WFMMC in connection with their respective businesses and operations;
6. changes in the availability and salaries of employees who are required by WFMMC to operate their respective businesses and operations;
7. changes in preferences of customers of WFMMC;
8. changes in competitive conditions under which WFMMC operates, and the ability of WFMMC to compete under such conditions;
9. changes in the future capital needs of WFMMC and the availability of financing and capital to fund such needs;
10. war or acts of international or domestic terrorism;
11. occurrences of catastrophic events, natural disasters and acts of God that affect the businesses and/or operations of WFMMC;
12. other factors beyond the control of WFMMC; and
13. any risk and uncertainties associated with WFMMC and their businesses and operations, the WFM tokens, the WFM Token ICO.

All forward-looking statements made by or attributable to WFMMC or persons acting on behalf of WFMMC are expressly qualified in their entirety by such factors. Given that risks and uncertainties that may cause the actual future results, performance or achievements of WFMMC to be materially different from that expected, expressed or implied by the forward-looking statements in this Whitepaper, undue reliance must not be placed on these statements. These forward-looking statements are applicable only as of the date of this Whitepaper.

Neither WFMMC nor any other person represents, warrants and/or undertakes that the actual future results, performance or achievements of WFMMC will be as discussed in those forward-looking statements. The actual results, performance or achievements of WFMMC may differ materially from those anticipated in these forward-looking statements.

Nothing contained in this Whitepaper is or may be relied upon as a promise, representation or undertaking as to the future performance or policies of WFMMC. Further, WFMMC disclaim any responsibility to update any of those forward-looking statements or publicly announce any revisions to those forward-looking statements to reflect future developments, events or circumstances, even if new information becomes available or other events occur in the future.
